ET-struct Starting Point

No one could have foreseen in 2000 and 2001 at the time when the EU formulated its Lisbon and Gothenburg goals that there would be a global financial and economic crisis in 2008 that would change many of these ambitious transnational goals and cause widespread uncertainty, especially in the daily lives of European citizens who see their jobs, lives and security under threat.

As new ambitious transnational goals are being formulated and presented (e.g. EU 2020, http://ec.europa.eu/eu2020/index_en.htm) who can predict what will happen in the future?

One thing is certain: regional economies must be in a position to cope with the pressures. They have to be able to react to and predict changing conditions, and they must be able to educate, train and retrain their workforces to meet the challenges.

Individual citizens have to be supported so that they can contribute to their own individual economic security, as well as to the security of the region and in a wider context to a united Europe.

Time to act

The CENTRAL EUROPE supported project ET-struct aims at supporting regional stability and growth. How?

1. ET-struct will bring together three of the major players that influence regions in permanent management structures: regional politics; regional economy; regional education-training
2. ET-struct will compile a dynamic inventory of skills and competences needed for CENTRAL EUROPE (“new-skills-for-new-jobs”)
3. ET-struct will develop and pilot on-site and online learning systems to educate, train and retrain regional workforces.

A partnership for growth and stability

Until the end of 2012, 16 partners from 6 EU CENTRAL EUROPE countries, plus a partner from the West-Ukraine will work together towards *regional stability and growth*...
