##### ET-struct Project Presentation in Brussels

“...connecting educational-training system to regional economies  
for regional stability and growth...”

At the project presentation of the CENTRAL EUROPE Project *ET-struct* - EconomicEducational Territorial Structure experts dealing with education and economy, authorities and decision makers will be discussing how to support regional stability and growth.

*ET-struct* aims at networking the regional economy to schools and vocational training institutions so that regional workforces can be prepared for the rapidly changing demands of the job market.

In connected stages (“new-skills-for-new-jobs”, *ET-Academy*, *ET-LearnTrain*, *ET-Management*) a model will be developed and modified that will be valid for a 21<sup>st</sup> century Europe. The upgrade of vocational workforce qualifications will in turn stabilise and strengthen regional economies.
